

Please double check these codes on your unit before using them. I do not think that the codes have been changed over the years, but I am not certain of that. My unit is 7 or 8 years old.

Here are some more geosafari codes. These are for 26 questions. The left columns are for the left side of the unit and the right columns are for the right side. I got these codes by randomly entering a 4 digit number for the "code". If the unit accepted the number, I went through the game pressing the ? button to get the information for the code.

Donna Young :-)
